

## MORNING LEADER.

PUBLISHED BY  
E. COWLES & CO.

FRIDAY MORNING, OCT. 8, 1888

### Republican State Nominations.

For Supreme Judge,  
WILLIAM V. PECK, of Scioto.  
For Comptroller,  
WILLIAM B. THRELL, of Franklin.  
For Attorney General,  
CHRISTOPHER P. WOLCOTT, of Summit.  
For Member of House of Representatives,  
JOHN L. MARTIN, of Butler.

### Republican District Nominations.

For Member of Congress,  
EDWARD WADE, of Cuyahoga.

### Republican County Nominations.

For Judge of the Court of Common Pleas,  
HORACE FOOTE.  
For Sheriff,  
DAVID L. WIGHTMAN.  
For Auditor,  
WILLIAM FULLER.  
For Recorder,  
JOHN PACKARD.  
For Commissioner,  
WILLIAM W. RICHARDS.

### City Nominations.

For Assessor,  
1st District—ELIAS S. ROOT,  
2d "—CHARLES J. BALLARD,  
3d "—WILLIAM BOWLER.  
For Justice,  
WELLES PORTER,  
SAMUEL FOLAMBE,  
ERASTUS SMITH.

### Cele of the People's Holiday.

We felt proud of old Cuyahoga yesterday afternoon. The Fair Grounds were literally packed with people, and the Exhibition was worthy of the people. It was by far the best County Fair ever held in Cleveland, and was in all respects highly creditable to the Officers of the Agricultural Society, and the multitude of Exhibitors from the City and the Country. A fine sum must have been added to the treasury of the Society during the past three days. Judging from the interest manifested in the Fair this season, larger grounds and more extensive and convenient fixtures will be necessary hereafter. Suitable Fair Grounds will have to be purchased or leased for a term of years, and permanent, commodious Halls, etc. erected. The sooner the better.

### Funeral of Karl Lucas.

The funeral of Karl Lucas, in Cincinnati, the victim of a political assassin, took place on the 6th. It was the largest funeral procession ever seen in the city, and deep-toned feeling pervaded the throng. The co-workers of the deceased, Mitchell and Rammelsberg, men, 440 fine looking, earnest citizens, led by Brandt's splendid escort band, with solemn tread and uncovered heads, marched past the hearse to a solemn dirge from the "Prophet." The Cabinet Maker's Society, 160 strong, with craped banner followed. Then the Turner's Society, numbering 250 members, followed by the Social Workmen's Society, 400 strong. They were borne and craped banners, but conspicuous was a transparency, one side of which appeared in German:

KARL LUCAS,  
The victim of a Political Kowdy of the Demo-

crats.  
Born 28th of August, 1825.  
Died 5th of October, 1888.  
And upon the reverse side the following:

THOU ROBBY  
MURDER

After this, in solid array, marching four abreast, came the Tenth Ward Republican Club, the Workingmen's League, the Flying Artillery, and the Hezre surrounded by sixteen Pal Bearers. The mourners in procession numbered three thousand, and it was about half an hour in passing a given point. The Commercial eye "the procession was characterized by a regular tramp, and the sad and solemn strains of the bands, were the only sounds which met the ear in its progress through the crowded thoroughfares." Thus was buried Karl Lucas, the German martyr of an unquashed Democratic assassin.

### Free Labor of Justice, City, Missouri.

In August last, pro-slavery won back the Capital of Missouri, and defeated Mr. Gardener, the champion of free soil and free labor by a majority of 14 votes in the city. On the 23rd inst., a special election for an Alderman was had, and Mr. Knap, the free soil candidate was chosen by three majority. In August the election was viva voce, and men were intimidated, while the municipal election was by ballot, and men voted their sentiments. A Jefferson City letter says "with the ballot system Cole county would have elected Gardener in August last by a large majority. It is said that the pro-slavery Democracy in the next Legislature will strike at the ballot system and forbid its use, even in municipal concerns, thus insuring the war against freedom of voting, as well as freedom of speech." The St. Louis Democrat speaks thus cheerfully of the returning victory at the Capital and the future:

What has transpired there, will also transpire here, and in every other part of this State, for there is that about the St. Louis progression which will not permit it to stop. The checks that the band or overthrow other parties, only give hardness to its muscle and elasticity to its spirit. It, and we say this day more than ever persuaded that the time is near by that will see Missouri relieved of the incubus of the slave system, through with the sturdy enterprise of white labor, and advancing at a giant pace to that rank in the confederacy which her central position, her fertile climate and her vast resources so well entitle her to occupy.

### A New Weather.

The winds were of a high frolic yesterday, tossing about white caps on Erie and all sorts of caps and hats on shore. It blew such great gusts that the propeller Genesee Chief when off Vermilion could not make headway, and ran back to this port. Last night a cold rain set in, the pleasant weather for a fortnight winding up with a past due equinox.

### Lightning and Tooth Pulling.

Electricity has become a great institution, and the London Times and Boston Medical and Surgical Journal vouch for the importance of the discovery of pulling teeth by means of electricity. The Boston Traveller states that some of the dentists of Boston have arranged, with but little or no pain to the patient. The wife of a lawyer in Boston had fourteen teeth taken out at one sitting, and said she felt no sort of pain, only a disagreeable sensation at the instant of grasping the tooth. Others experienced a moderate degree of pain. The advantages of this anesthetic over ether or chloroform are, that there is no danger from it, and there are no disagreeable results.

### Black River Harbor.

A report having got in the papers that a bar had formed across the mouth of the harbor at Black River, the Light-house Keeper corrects the statement in the Blythe Democrat. He says the bar is formed about 40 feet below the warehouse of H. Muesey, and that vessels of any draft of water may, ignoring the Lakes can come up the harbor at least three hundred and fifty yards into the Light-house.

### Pike's Peak a Hump!

The later and reliable accounts from the Kansas gold regions throw cold water on the yellow fever which is carrying off so many of the Western people. Infatuated and exaggerated accounts were published, based on the reports of some of the early retired adventurers, and the public pulse run up to fever heat. Fabrication was substituted for fact, and a little gold was magnified into an inexhaustible supply.

### The Western Democrat, published at Harrison, Missouri, Sept. 25th, states some facts worth knowing to such as have become glibly crazed. It announces the arrival of Mr. B. G. Johnson, an old and reliable citizen, from Pike's Peak, who went out in May with a party of twenty-seven, twenty-three of whom returned with him, to stay. The party prospected on Cherry Creek from its head to the mouth, and they neither saw or heard of the rich diggings reported by other adventurers. The party also prospected in the vicinity of Pike's Peak, and saw old California miners engaged in the same business, but failed to find sufficient deposits of gold to justify them in attempting to wash the dirt. Mr. Johnson says small particles of gold were found in all parts of the surrounding country, equal in quantity and quality on the hillsides and in the valleys, on the beach and in the rivulets, in all cases on or a very few inches below the surface, and in no instance over four feet. He never heard of any person washing out over \$2 in one day, and those who labored from morning till night did not average \$1 per day.

### Mr. Johnson reports that at no time has there been more than one hundred and fifty men at the gold mines, and when he left, on the 25th of July, but fifty-seven men all told could be found in the district possessed of sufficient hope and perseverance to remain longer. Neither was it true that the men were destitute of mining tools. They were well supplied with mining apparatus, brought by old California miners for the purpose of mining extensively; but after a few days trial the pans and rockers were thrown aside as worthless, as washing of dirt would not pay. Such in brief is the discouraging side of the story. The bright side we have had, and many Pike Peak adventures have no doubt learned the truth of the old adage, that all is not gold that glitters.

### Delaware Election.

The State election held in Delaware on the 5th, resulted in the success of the Democratic ticket by 750 majority. In portions of the State the People's tickets were chosen.

### Western Reserve Horse Fair.

We copy from the Portage County Democrat the List of Premiums offered at the first annual Fair of the Western Reserve Horse Breeder's Association, to be held at Ravenna, October 19th, 20th and 21st. The grounds will be in readiness in a few days. The buildings, etc., are in process of erection. The Superintendent are Wm. H. Potts, of Cleveland, N. Eggleston, of Aurora, and James S. Leffingwell, of Ravenna. Marshals, E. B. Tyler, Chief, Mr. Andrews and A. D. Burt, Assistants, S. W. Treat, Clerk of Police.

### The first day will be devoted to entries; the second day to the Exhibition of Classes No. 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 15 and 16; the third day to Classes No. 12, 13, 14, 18, 19, 20 and 21.

### LIST OF PREMIUMS.

Class No. 1.  
Best stallion for all purposes, for yearling and over \$25.00  
Second do. 15.00  
Class No. 2.  
Best stallion for all purposes, two years and under \$25.00  
Second do. 15.00  
Class No. 3.  
Best stallion for all purposes, under two years and \$25.00  
Second do. 15.00  
Class No. 4.  
Best brood mare \$25.00  
Second do. 15.00  
Class No. 5.  
Best brood mare, yearling and over \$25.00  
Second do. 15.00  
Class No. 6.  
Best brood mare, under two years and \$25.00  
Second do. 15.00  
Class No. 7.  
Best brood mare, yearling and over \$25.00  
Second do. 15.00  
Class No. 8.  
Best brood mare, under two years and \$25.00  
Second do. 15.00  
Class No. 9.  
Best brood mare, yearling and over \$25.00  
Second do. 15.00  
Class No. 10.  
Best brood mare, under two years and \$25.00  
Second do. 15.00  
Class No. 11.  
Best brood mare, yearling and over \$25.00  
Second do. 15.00  
Class No. 12.  
Best brood mare, under two years and \$25.00  
Second do. 15.00  
Class No. 13.  
Best brood mare, yearling and over \$25.00  
Second do. 15.00  
Class No. 14.  
Best brood mare, under two years and \$25.00  
Second do. 15.00  
Class No. 15.  
Best brood mare, yearling and over \$25.00  
Second do. 15.00  
Class No. 16.  
Best brood mare, under two years and \$25.00  
Second do. 15.00  
Class No. 17.  
Best brood mare, yearling and over \$25.00  
Second do. 15.00  
Class No. 18.  
Best brood mare, under two years and \$25.00  
Second do. 15.00  
Class No. 19.  
Best brood mare, yearling and over \$25.00  
Second do. 15.00  
Class No. 20.  
Best brood mare, under two years and \$25.00  
Second do. 15.00  
Class No. 21.  
Best brood mare, yearling and over \$25.00  
Second do. 15.00

### The Great Chicago Land Suit Decided.

The very important case of George C. Bates vs. The Illinois Central Railroad Company, in the United States Court, Judge McLean presiding, Judge Drummond Associate, has terminated in a verdict for the defendants. The Tribune says the verdict accords with the general expectation of the public. Few will complain outside the number of co-adventurers with the plaintiff.

### The case is one which from the outset has attracted much attention in this community, and in commercial circles throughout the country, both from the magnitude of the value of the property in controversy, variously estimated at from one and a half to two millions of dollars, comprising almost the entire depot grounds of the Company on the lake shore at the mouth of the river, and also for the singular nature of the plaintiff's claims based on a slumbering and generally believed extinct title to a sand bar or spit of land, which by the opening of the straight channel of the river some twenty-five years since, was thrown from the North into the South Division, and within a few years afterwards extinguished by the action of the waters of the lake. It was understood, and indeed in evidence, that the sum of right dollars purchased the right and title of the plaintiff and was generally believed to be in his adventurous crusade.

### Narrow Escape.

Mr. C. J. Thomas, of Niagara, in attempting to cross from Navy Island to Schlosser was caught in the storm of Thursday, he lost his boat, to which he clung for an hour, but at last succeeded in righting it, and got in, but was without oars and was so chilled as to be unable to help himself. The boat, nearly full of water, drifted before the wind past Navy Island into the strong current on the opposite side, that bore him swiftly towards the creek. He was discovered by two men at this critical juncture, who succeeded in towing the boat into Chippewa Creek.

### Assessor's Boxes.

Separate ballot-boxes must be provided for the votes for Assessors. See law.

### Still They Come.

Through the vigilance of our Sheriff, two more arrests have been made in Cleveland, of those who broke into Shaker's store about two weeks since. As at the trial yesterday, they were held to trial in the sum of \$1,000 each.—*Medina Gazette.*

### The Destruction of the Crystal Palace.

The Crystal Palace was erected in 1853, by a chartered Association, for the "World's Fair." It was constructed almost entirely of iron and glass, and seemed nearly fire proof. Yet its destruction by the devouring element was more swift than any building of wood could possibly have been. In fifteen minutes after the fire was discovered the beautiful fabric of the builder's skill, with its priceless treasures of industry and art, was a heap of blackened ruins. The great dome, so long an object of beauty towering in the city, fell in twelve minutes after the work of destruction began. The gaudy bubble disappeared suddenly as the sun-painted of childhood.

### The first cost of the Palace was \$711,000.—

The improvements and additions increased the sum to \$750,000. No stockholder ever received a cent of dividend, and no bondholder a farthing of interest. The Association went in to bankruptcy in 1854, and last spring the city authorities took possession of the property, and leased it to the American Institute. We append a brief description of the Palace:

### The general idea of the edifice was a Greek cross, surrounded by a dome at the intersection.

Each arm of the cross was 365 feet 5 inches long. There were three similar entrances; one on the Sixth Avenue; one on Fortieth, and one on Forty-second street. Each entrance was 41 feet wide, and that on Sixth Avenue was approached by a flight of 8 steps. Over each front was a large semi-circular fanlight, 41 feet wide and 21 feet high, answering to the arch of the nave. Each arm of the cross was the ground plan 149 feet broad. This was divided into a central nave and 2 aisles, one on each side; the nave 41, each aisle 54 feet wide.

### The central portion of the nave was carried up to a height of 67 feet, and the semi-circular arch by which it was spanned, was 41 feet broad. There were thus in effect two arched naves crossing each other at right angles, 41 feet broad, 67 feet high to the crown of the arch, and 365 feet long; and on each side of these naves was an aisle 54 feet broad and 45 feet high. The exterior of the ridge-way of the nave was 71 feet. Each aisle was covered by a gallery of its own width, and 24 feet from the center of the nave, and 24 feet from the center of the nave. The central dome, a magnificent design, was 100 feet in diameter, 68 feet inside from the floor to the spring of the arch, and 118 feet to the crown; and on the outside, with the lantern, 149 feet. The exterior angles of the building were ingeniously filled up with a triangular lean to 24 feet high, which gave the ground plan an octagonal shape, each side or face being 149 feet wide. At each angle was an octagonal tower, 8 feet in diameter and 75 feet high.

### The building contained on the ground floor, 111,000 square feet of space, and in its galleries, which were 54 feet wide, 62,000 square feet more, making a total area of 173,000 square feet, for the purpose of exhibition.—

### There were thus on the ground floor two acres and a half, or exactly 2 1/2 lots, in the galleries one acre and 44,000; total, with an inconceivable facade, four acres.

### Mr. G. Geisenhainer, Chairman of the Board of Managers of the American Institute, has made the following interesting statement of facts touching the great conflagration:

Mr. Geisenhainer was standing in the south nave near the Fortieth street entrance when he heard the alarm of fire in the north nave. He ran rapidly to the Forty-second street entrance, where he discovered a quantity of wooden patterns of the iron and steel progress of the construction of the Palace, and which had been deposited in the west side of the entrance, enveloped in a rapidly extending flame, which had already communicated to the flight of stairs near the building, looking for persons in retired places, the flames, and they licked over the planking, rolling up dense clouds of smoke, which nearly suffocated those in the north nave. After dispatching a man to turn off the gas, which had just been turned on for the evening, Mr. Geisenhainer ran to a hydrant, with hose attached, near the north entrance, and caused the water to be turned on. Owing however, to the low water in the reservoir, it was of no avail; the flames continued to progress with fearful rapidity, rendering the steam pump and fire engines and apparatus at this time unavailable, had there been a sufficiency of water. As a second cause of the fire, Mr. Geisenhainer says, the building, looking for persons in retired places, the flames, and they licked over the planking, rolling up dense clouds of smoke, which nearly suffocated those in the north nave. After dispatching a man to turn off the gas, which had just been turned on for the evening, Mr. Geisenhainer ran to a hydrant, with hose attached, near the north entrance, and caused the water to be turned on. Owing however, to the low water in the reservoir, it was of no avail; the flames continued to progress with fearful rapidity, rendering the steam pump and fire engines and apparatus at this time unavailable, had there been a sufficiency of water. As a second cause of the fire, Mr. Geisenhainer says, the building, looking for persons in retired places, the flames, and they licked over the planking, rolling up dense clouds of smoke, which nearly suffocated those in the north nave. After dispatching a man to turn off the gas, which had just been turned on for the evening, Mr. Geisenhainer ran to a hydrant, with hose attached, near the north entrance, and caused the water to be turned on. Owing however, to the low water in the reservoir, it was of no avail; the flames continued to progress with fearful rapidity, rendering the steam pump and fire engines and apparatus at this time unavailable, had there been a sufficiency of water. As a second cause of the fire, Mr. Geisenhainer says, the building, looking for persons in retired places, the flames, and they licked over the planking, rolling up dense clouds of smoke, which nearly suffocated those in the north nave. After dispatching a man to turn off the gas, which had just been turned on for the evening, Mr. Geisenhainer ran to a hydrant, with hose attached, near the north entrance, and caused the water to be turned on. Owing however, to the low water in the reservoir, it was of no avail; the flames continued to progress with fearful rapidity, rendering the steam pump and fire engines and apparatus at this time unavailable, had there been a sufficiency of water.
